SUMMARY

Frontend Engineer with **5+ years of experience** building scalable, high-performance web applications using **React, JavaScript, Redux, HTML, and CSS**. Experienced in **modernizing legacy systems**, improving **frontend performance**, building **reusable UI components**, and delivering maintainable frontend solutions for enterprise-grade products.

EXPERIENCE

SAS

May 2023 – Present

Senior Associate Software Developer

Pune, India

- Developed and maintained **scalable React-based UI components** for **SAS CI360**, supporting complex enterprise workflows and improving UI consistency across the application.
- Contributed to the **migration of legacy SAP OpenUI5 screens to React**, helping modernize the frontend architecture and improve maintainability.
- Replaced legacy table implementations with **AG-Grid**, improving UI responsiveness and enabling advanced features such as **sorting, filtering, and pagination**.
- Built a **Mirage.js mock server** to simulate backend APIs, enabling parallel frontend development and reducing dependency on backend readiness.
- Collaborated closely with **designers, backend engineers, and product teams** to deliver production-ready, user-centric interfaces aligned with business requirements.

Tata Consultancy Services (TCS)

Oct 2020 – Apr 2023

Systems Engineer

Pune, India

- Contributed to frontend development of a **Comcast Smart TV application** using **Lightning.js**, optimizing UI behavior and navigation for large-screen devices.
- Built and enhanced user-facing features for **movie, TV listing, and music streaming** experiences, integrating platforms such as **Prime Video** and **YouTube**.
- Designed and developed the **MIDAS test management portal**, improving workflow efficiency and usability for QA and testing teams.
- Improved onboarding efficiency by building intuitive UI flows that helped reduce **training time for new testers by 50%**.

PROJECTS

Spendo | React, Redux, Node.js, MongoDB, Speechly

- Built a **MERN-based expense tracking application** to manage income and expenses with real-time data visualization.
- Integrated **voice-based input using Speechly** to improve accessibility and user interaction.
- Designed a **responsive UI** focused on ease of use and clean data presentation.

Postnest | React, Redux, Node.js, MongoDB, JWT

- Developed a **full-stack blogging platform** with **JWT-based authentication** and complete CRUD functionality.
- Implemented secure user flows for creating, editing, and managing posts with focus on performance and reliability.
- Built a **responsive and user-friendly interface** optimized for multiple screen sizes.

EDUCATION

VIT University, Vellore

B.Tech in Information Technology

Jun 2016 – Jun 2020

Vellore, India

SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, Redux, React Hooks, HTML5, CSS3

Libraries / UI: AG-Grid, Material UI, Lightning.js, Mirage.js

Backend (Working Knowledge): Node.js, Express.js, MongoDB, REST APIs

Tools / Practices: Git, JIRA, Agile, SDLC, Responsive Design, Cross-functional Collaboration
