SUMMARY

Senior Frontend Engineer with 5 years of experience building scalable, high-performance web applications using React, JavaScript, and Redux. Experienced in modernizing legacy systems, improving UI performance, and delivering enterprise-grade solutions for large-scale products. Strong focus on clean architecture, performance optimization, and user-centric design.

WORK EXPERIENCE

Senior Associate Software Developer, SAS

May 2023 - Present

- Developed and maintained scalable React-based UI components for SAS CI360, supporting complex enterprise workflows and ensuring consistent user experience across devices.
- Migrated legacy SAP OpenUI5 codebase to modern React architecture, significantly improving maintainability, responsiveness, and long-term scalability.
- Replaced existing React tables with AG-Grid, improving UI performance by ~25% and enabling advanced features such as sorting, filtering, and pagination.
- Designed and implemented a Mirage.js mock server to simulate backend APIs, enabling parallel frontend development and reducing dependency on backend availability.
- Collaborated closely with designers, backend engineers, and product teams to deliver high-quality, user-centric interfaces aligned with business requirements.

Systems Engineer, Tata Consultancy Services

Oct 2020 - Apr 2023

- Contributed to frontend development of a Comcast Smart TV application using Lightning.js, delivering smooth navigation and optimized performance for large-screen devices.
 - Implemented movie, TV listing, and music streaming features integrating platforms such as Prime Video and YouTube.
 - Designed and developed the MIDAS test management portal, focusing on usability and workflow efficiency.
 - Reduced onboarding and training time for new testers by ~50%, streamlining adoption for over 10+ team members through improved UI/UX design.
-

SKILLS & EDUCATION

- Frontend:** JavaScript (ES6+), TypeScript, React, Redux, React Hooks, HTML5, CSS3
 - UI Libraries:** AG-Grid, Material UI
 - Backend (Working Knowledge):** Node.js, Express.js, MongoDB, REST APIs
 - Tools & Practices:** Git, JIRA, Agile, Responsive Design, SDLC
 - Education:** B.Tech in Information Technology, VIT University, Vellore | Jun 2016 - Jun 2020
-

PROJECTS

Spendo - HTML, CSS, JavaScript, React, Redux, Node.js, MongoDB, Speechly

- Built a MERN-based web application to track income and expenses with real-time data visualization.
- Integrated voice-based input using Speechly to enhance user interaction and accessibility.
- Designed a fully responsive UI ensuring smooth performance and intuitive data interaction.

Postnest - HTML, CSS, JavaScript, React, Redux, Node.js, MongoDB

- Developed a full-stack blogging platform with JWT-based authentication and complete CRUD functionality.
 - Implemented secure user flows for creating, editing, and managing posts with a focus on performance and reliability.
 - Delivered a responsive, user-friendly interface optimized for multiple screen sizes.
-
